this book presents recent research on predictive econometrics and big data gathering edited papers presented at the 11th international conference of the thailand econometric society tes2018 held in Chiang Mai Thailand on January 10-12, 2018. Its main focus is on predictive techniques which directly aim at predicting economic phenomena and big data techniques which enable us to handle the enormous amounts of data generated by modern computers in a reasonable time. The book also discusses the applications of more traditional statistical techniques to econometric problems. Econometrics is a branch of economics that employs mathematical especially statistical methods to analyze economic systems to forecast economic and financial dynamics and to develop strategies for achieving desirable economic performance. It is therefore important to develop data processing techniques that explicitly focus on prediction. The more data we have the better our predictions will be. As such these techniques are essential to our ability to process huge amounts of available data.

In the World Library of Psychologists series international experts present career long collections of what they judge to be their most interesting publications. Extracts from books, key articles, research findings and practical and theoretical contributions. Marc H. Bornstein has published widely in experimental, methodological, comparative, developmental and cultural science as well as neuroscience, pediatrics and aesthetics. In this volume he has collected an integrated series of his papers on parenting. Many disciplines over many centuries have expounded on parenting but theory and opinion have prevailed. Bornstein initiated efforts to make parenting an evidence-based field of study through his journal *Parenting Science and Practice*, the *Handbook of Parenting* and two monographs.

series monographs in parenting and studies in parenting in addition bornstein has undertaken empirical studies that address the determinants nature scope and consequences of parenting the writings selected for this collection symbolize the development of an empirical parenting science and the meaning and importance of parenting for the lives and well being of children parents and society including a specially written introduction in which marc bornstein reflects on the importance of parenting and contextualizes both the field and the evolution of his wide ranging career this collection will serve as a valuable resource for students and researchers of parenting developmental science and all disciplines from anthropology to zoology concerned with nurturing socializing and educating the next generation
